

VACUUM SYSTEM

don't gamble with...

...underground utilities

Our new vacuum system will truly work to your advantage with features such as:

- Greater suction power than our competitor's vacuum trucks, greatly increasing production rates in difficult boring clearance areas where large cobbles can be troublesome.
- Equipped with onboard concrete and asphalt coring capabilities that eliminate the need to schedule multiple vendors for borings clearance tasks.
- A raised tank platform that will dump and discharge all waste directly into 55 gallon drums.
- Superior features including air-knifing and hydro-jetting to ensure clearance objectives are met in the toughest conditions.
- Factory trained personnel to ensure the safest, most efficient operation possible.
- Operators have OSHA 40 hour HAZWOPER and Oil Company specific training.
